- Wear appropriate protective clothing, gloves, eye/ face protection and suitable respirator.
- Use this product in a well-ventilated area.
- Ensure that the application of the product is in accordance with Alphaglaze recommendations.
- Due care and consideration should be taken where water collection methods are present. Alphaglaze recommends allowing 10 days curing and an initial rinse (rain or tap water wash) prior to reconnecting water collection systems.
- The surface preparation is the responsibility of the Builder, Renovator, Contractor or Applicator. It is also the responsibility of the Applicator to ensure that the substrate is of an acceptable standard prior to the application of the Alphaglaze Coating System.

DISCLAIMER: The recommendations and data provided in this document are true and accurate at the time of testing. The information is given in good faith but without any guarantee as conditions and methods of use on the Alphaglaze product are beyond Alphaglaze's control. Alphaglaze recommends that the applicator of this product conducts a small test patch in an inconspicuous area to determine the suitability of the Alphaglaze material and its recommendations prior to use or application.
